Proofs Involving Similar Triangles

We all look the same, don't we?

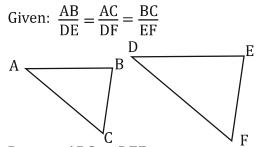

Okay, so if you can do proofs involving congruent triangles, then proving triangles are similar will be a piece of cake. Why? Because they are basically the same except we are proving that the triangles are exactly the same shape but different sizes. Remember for similarity we have the SSS, SAS, and AA (and AAA) theorems. There is a notation thing with similarity. The way that most proofs demonstrate that two pairs of sides have the same ratio is to write them as in the following example...

This means that \overline{AB} and \overline{DE} have the same ratio of similarity as \overline{BC} and \overline{EF} . (Combined with the included angles gives us SAS similarity.)

Ready? Let's do some more analysis and then practice....

AE. 1.

, DEE

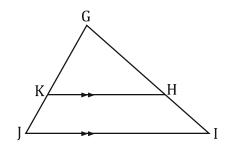

Prove: AABC~ADEF	
Statements	Reasons_
$1. \frac{AB}{DE} = \frac{AC}{DF} = \frac{BC}{DF}$	1. Given
2. △ABC∼△DEF	2. SSS

Analysis:

Working backward we must ask the key question. "How can we show two triangles are similar?" The answer? Use a similarity property such as SSS, SAS, or AA (AAA). That leads us to B1: by one of these properties. But which one? We need to start working forward. We see we have given AB/DE, AC/DF, and BC/EF. This gives us △ABC~△DEF by SSS, which is B1, and the proof is complete!

AE. 2.

Given: JI||KH

Prove: △JGI~△KGH Statements

1. JI||KH 1. Given

2.∠J≅∠GKH 3.∠I≅∠GHK

4. △JGI∼△KGH

Reasons

- 2. Corresponding Angles
- 3. Corresponding Angles

4. AA

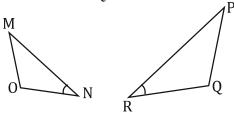

Analysis:

Working backward we must ask the key question. "How can we show two triangles are similar?" The answer? Use a similarity property such as SSS, SAS, or AA (AAA). That leads us to B1: △JGI~△KGH by one of these properties. But which one? We need to start working forward. Parallel lines... and when we see parallel lines we should look for corresponding angles or alternate interior angles. We see we have the corresponding angles ∠J≅∠GKH, and ∠I≅∠GHK. This gives us △JGI~△KGH by AA, which is B1, and the proof is complete!

Write an analysis of each proof below.

1. Given:
$$\frac{MN}{PR} = \frac{ON}{OR}$$
, $\angle N \cong \angle R$

Analysis:

Prove: △MNO~△PQR

Statements	Reasons
$1. \frac{MN}{PR} = \frac{ON}{QR}$	1. Given
2.∠N≅∠R 3. ∆MNO~∆PQR	2. Given 3. SAS

∠. Given: ∠S≅∠W

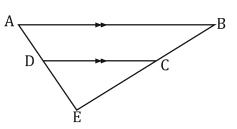

S U W

Analysis:

Prove: △SUV~△TUW

Statements	Reasons
1.∠S≅∠W	1. Given
2.∠SUV≅∠WUT	2. Vertical Angles
3. △SUV~△TUW	3. AA

3. Given: AB||DC

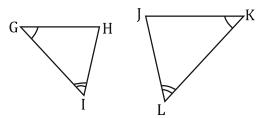

Analysis:

Prove: △ABE~△DCE

Statements	Reasons
1. AB DC	1. Given
2.∠A≅∠CDE	2. Corresponding Angles
3.∠B≅∠DCE	3. Corresponding Angles
4. △ABE∼△DCE	4. AA

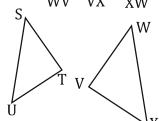

4. Given: $\angle G \cong \angle K$, and $\angle I \cong \angle L$

Prove: △GHI~△KJL

Statements	Reasons
1.∠G≅∠K	1.
2.	2. Given
3. △GHI∼△KJL	3.

6. Given: $\frac{ST}{WV} = \frac{TU}{VX} = \frac{US}{XW}$

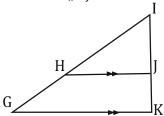

Prove: △STU~△WVX

Statements	Reasons
1.	1. Given
2.	2. SSS

8.

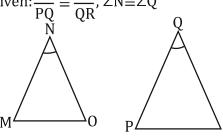

Given: $\overline{GK} \| \overline{HJ}$

Prove: △GIK~△HIJ

Statements	Reasons
1. 2. 3. ∠G≅∠JHI 4. ΔGIK~ΔHIJ	 Given Corresponding Angles 4.

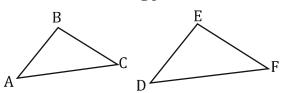

5. Given: $\frac{MN}{PQ} = \frac{NO}{QR}$, $\angle N \cong \angle Q$

Prove: △MNO~△PQR

Statements	Reasons
$1. \frac{MN}{PQ} = \frac{NO}{QR}$	1.
2.3. ΔΜΝΟ~ΔPQR	2. Given 3.

7. Given: $\frac{AB}{DE} = \frac{BC}{EF} = \frac{AC}{DF}$

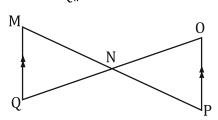

Prove: △ABC~△DEF

Statements	Reasons
1.	1. Given
2 ∧ABC~∧DEF	2 555

9.

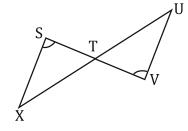

Given: $\overline{MQ} \| \overline{OP}$

Prove: △MNQ~△PON

Statements	Reasons
1. 2. ∠QMN≅∠OPN 3. 4. ΔGIK~ΔHIJ	1. Given 2. 3. Vertical Angles 4.

Given: ∠S≅∠V

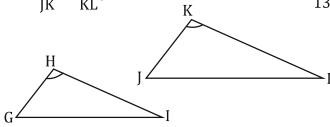

Prove: △STX~△VUT

Statements	Reasons
1.	1. Given
2. ∠STX≅∠UTV	2.
3. △GHI∼△KJL	3.

12.

Given: $\frac{GH}{JK} = \frac{HI}{KL}, \angle H \cong \angle K$

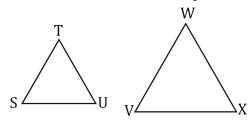

Prove: △GHI~△JKL

Statements	Reasons
1.	1. Given
2.3. ΔΜΝΟ~ΔPQR	2. Given 3.

14.

Given: \triangle STU and \triangle VWX are equilateral.

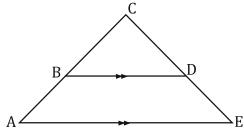

Prove: △STU~△VWX

Statements	Reasons
1.∠S≅∠V	1. Def of Equilateral Triangles
2.∠T≅∠W	2.
3.∠U≅∠X	3.
4.	4. AAA

11.

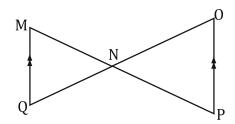

Given: $\overline{AE} \parallel \overline{BD}$

Prove: △ACE~△BCD

Statements	Reasons
1. AE BD 2. 3. 4.	 Corresponding Angles AA

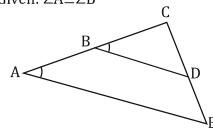

13. Given: $\overline{MQ} \| \overline{OP}$

Prove: △MQN~△OPN

Statements	Reasons
1. MQ∥OP	1.
2.∠QMN≅∠OPN	2.
3.	3. Alternate Interior
4. △MQN∼△OPN	4.
15	

Given: ∠A≅∠B

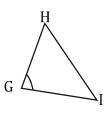

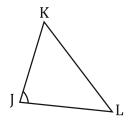

Prove: △ABE~△BCD

Statements	Reasons
1.	1. Given
2. ∠C≅∠C	2.
3. △GHI∼△KJL	3.

16.

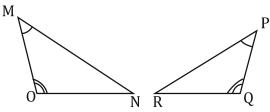

Given: $\frac{GH}{KJ} = \frac{GI}{JL}$, $\angle G \cong \angle J$

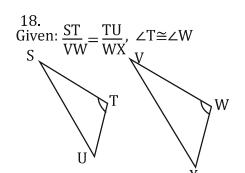

Prove: △GHI~△JKL

17. Given: $\angle M \cong \angle P$, $\angle O \cong \angle Q$

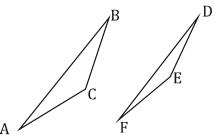

Prove: △OMN~△DBC

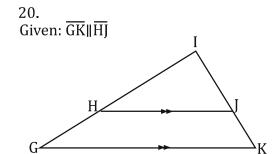

Prove: △STU~△VWX

19.

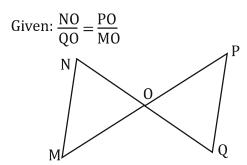

Prove: △ABC~△FDE

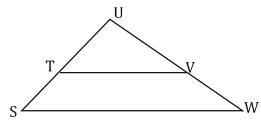

Prove: △GIK~△HIJ

21.

Prove: △MNO~△PQO

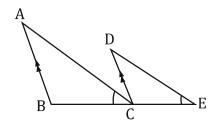

Given: ∠S≅∠UTV

Prove: △SUW~△TUV

23.

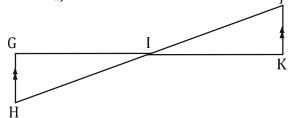

Given: $\overline{AB} \parallel \overline{DC}$, $\angle ACB \cong \angle E$

Prove: △ABC~△DCE

24.

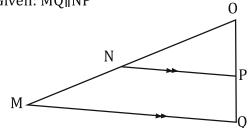

Given: $\overline{GH} \| \overline{JK}$

Prove: △GHI~△KJI

25.

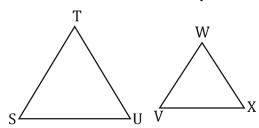

Prove: △QMO~△PNO

26.

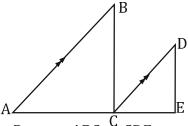

Given: △ABD and △BCD are equilateral

Prove: $\triangle STU \sim \triangle VWX$

27.

Given:
$$\frac{AB}{DC} = \frac{AC}{CE}$$
, $\overline{AB} \parallel \overline{CD}$

Prove: $\triangle ABC \sim \triangle CDE$
